C++ \ Symbian

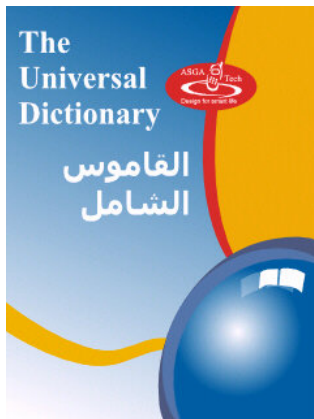

USER MANUAL

Introduction:

Welcome to **UniDic**, Application by ASGATech Mobile Solutions.

UniDic is a Multilanguage dictionary that contains a huge number of words and its perfect translation.

Using **UniDic**, you can find a word by its first characters then navigate among similar words to find your word and get its translation.

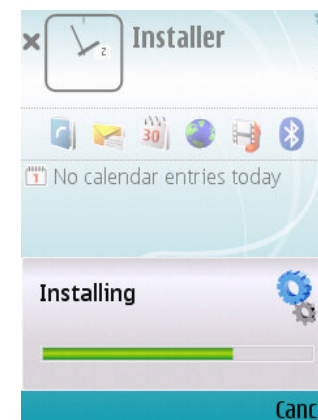

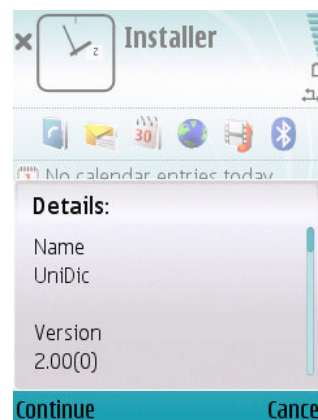

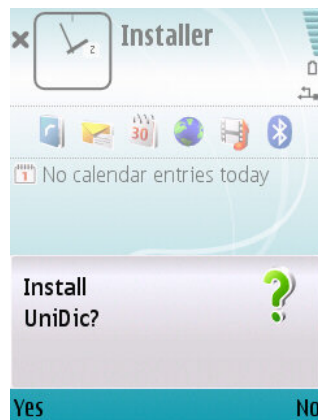

Main Features

UniDic offers many features:

1. Very nice and comfortable user interface.
2. 2 UI languages (English – Arabic).
3. Supported with a speaker to say the selected word.
4. 6 dictionaries with the ability to choose between them.
5. Rich dictionary, it contains about 60,000 Words and their translation.
6. Easy seeking for a specific word by using up and down arrows or by writing it.
7. Display the word and all its translations.
8. Enable you to copy the selected translation word.

Installation:

- Use Nokia PC Suite for installation or copy the installation package “**UniDic. Sis**” to your device memory then follow the step by step installation process.
- Refer to your phone user manual for more information about installing new applications.

Using UniDic:

- To run the application: go to “**Menu >Applications > UniDic**”.

1. Main View:

- Translation Screen ”Main View” consists of three different elements which are:

1. Words list:

- A list lied in the upper part of the screen containing all the words stored in UniDic ordered alphabetically and you can move among them using the navigation buttons.

2. Meanings List:

- A list lied in the middle part of the screen containing a list of meanings of the highlighted word in the words list; also you can easily move among them using the navigation buttons.

3. Input Text Box:

- To get a word from the user and search for its meaning.

- Write the word in the input text box then a list of its meanings will appear in the meanings list and you can easily move among them using navigation buttons.

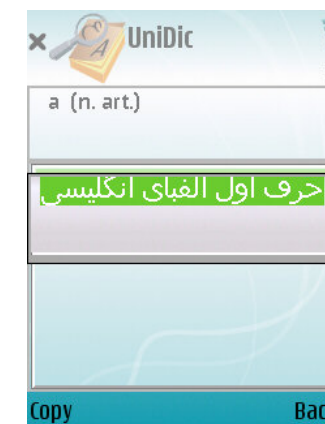

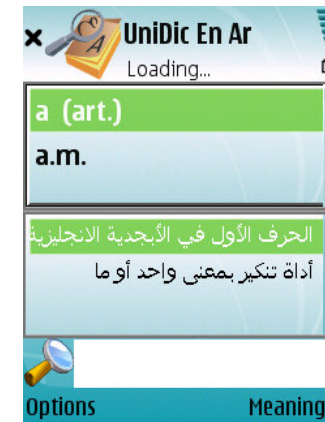

- You can easily switch the focus between the “Words List” and the “Meanings List” by pressing the right soft key “Meanings” or “Words”.

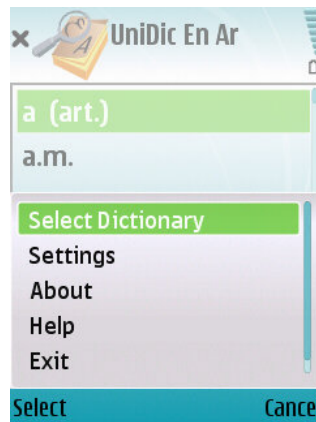

- Press OK button when the words list is focused to show the meanings of the highlighted word in a separate screen. also here, you can move among the different meanings. Also, you can press OK button again to show the selected meaning in a separate text box where you can easily copy it for external use.

- Press OK button when the meanings list is highlighted to put the selected meaning in a separate text box directly where you can easily copy it for external use.

2. Dictionary Selection:

- From the Main View Select: **Options** > **Select Dictionary**.
- Use **Up** and **Down** arrows to highlight the desired dictionary then Select: **Options** > **Select** or press the **OK** Key.
